

DV Counts Save & Submission Instructions

During the webinar on Wednesday, August 11, we ran into a slight hiccup when going to save the form to return to it later. Technology never seems to run smoothly when you really need it to. So, I've created a little guide on what you can expect when going through the submission process.

To save and return to the form:
Click *I'm not a robot* and then **SAVE & EXIT**

The next page will let you know the form was successfully saved. At this point, click the **COPY LINK** box. This will automatically copy the link. Save the link in a safe place so you can return to the form later. Once you return you can review your responses and then submit.

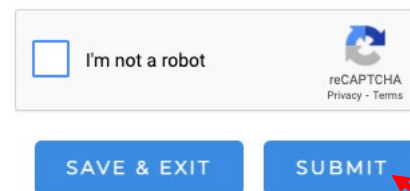

Your form is saved successfully. Please note that form saved is not form submitted. You will have to submit it when you are ready.

Click on the button below to copy the link to Continue your submission

Thank you for your time.

To complete the submission process:
click *I'm not a robot* and then **SUBMIT**.

After clicking submit, you will see a submission confirmation. Please PDF a copy of the page for your records. You can also click **COPY LINK** and use the link to view your submission. As noted during the webinar and in the survey packet, NNEDV will not be able to provide you with a copy of your submission.
